Forecast for Friday 09 Dec 2022

Weather: A few showers continue to affect northern hills overnight, elsewhere most places dry with long clear spells and a widespread frost, perhaps a few low level mist or freezing fog patches in the east. Then a bright day with, especially in the south and east, some good spells of sunshine, with snow showers likely across northern and western hills, perhaps the odd heavy one. Showers ease a little through the evening.

Chance of cloud-free hill tops above 800m: Around 60% in the north and west but close to 100% in south and east.

Low Cloud and visibility: Occasional or periods in the north and west above about 600m but little or no cloud below the summits in the south and east. Away from cloud visibility excellent but a kilometre or less in any early low level mist and freezing fog and at times in snow showers.

Eastern valley temperatures at dawn locally minus 4 or 5 Celsius.

Forecast for Saturday 10 Dec 2022

Weather: Occasionally heavy snow showers are expected to affect northern and western hills overnight, with southern and eastern parts dry and largely clear. Then a rather cloudy morning with snow showers, most frequent across the north and west. Becoming brighter by afternoon with eastern parts seeing the best of the sunshine as the showers become increasingly confined to the north and west.

Maximum wind: Variable 10mph or less.

Chance of cloud-free hill tops above 800m: Little chance at first becoming 60% in north and west and 75% in east by early afternoon.

Low Cloud and visibility: Periods or persistent cloud above 450-600m at first gradually lifting and breaking to become, especially in the east more occasional above 600m through the morning. Away from the cloud visibility very good but a kilometre or less in snow showers.

Temperature: **Valleys:** Around minus 2 or 3 Celsius overnight rising to 3 or 4 Celsius by day
At 800m: Around minus 4 Celsius
Freezing level: Around 300m
